1. Title

Auto MartX: AI-Powered Used Vehicle Trading Platform

2. Domain

Web Application | E-Commerce

3. Brand Name

Auto MartX

Problem Statement

Nowadays, many people buy and sell used vehicles through social media or different websites. This often leads to fake advertisements, incorrect pricing, and difficulty in finding genuine buyers or sellers. Buyers spend a lot of time searching for the right vehicle, while sellers struggle to reach interested customers. There is also no proper system to verify vehicle details or suggest a fair selling price. AutoMartX is developed to solve these problems by providing a secure and smart platform for buying and selling used vehicles.

Objectives

- To develop a secure platform for buying and selling used vehicles.
- To help sellers easily upload and manage their vehicle listings.
- To help buyers search and compare vehicles based on their needs.
- To provide AI-based price suggestions for fair vehicle pricing.
- To reduce fake listings by verifying vehicles and users.
- To provide a simple, fast, and user-friendly experience for all users.

Proposed Solution

AutoMartX is a web-based application where buyers and sellers can connect in one place. Sellers can upload vehicle details, photos, and documents, while buyers can search, filter, compare, and contact sellers easily. The system uses AI to suggest a fair market price for each vehicle. It also provides smart recommendations, secure communication, and an admin panel to verify listings and remove fake advertisements. This makes the vehicle trading process easier, safer, and more reliable.

Scope

The AutoMartX platform focuses on making used vehicle trading simple and secure.

In Scope

- User Registration and Login
- Buyer, Seller, and Admin modules
- Add, Edit, and Delete vehicle listings
- Search and Filter vehicles
- Vehicle Comparison
- Wishlist
- AI-based Price Prediction
- Vehicle Recommendations
- Google Maps for seller location
- Email Notifications
- Admin Verification of Listings

Out of Scope

- Online loan approval
- Vehicle insurance
- Live vehicle auction
- Vehicle servicing
- International vehicle trading
- Online payment gateway
